

TLS 1.2 Information

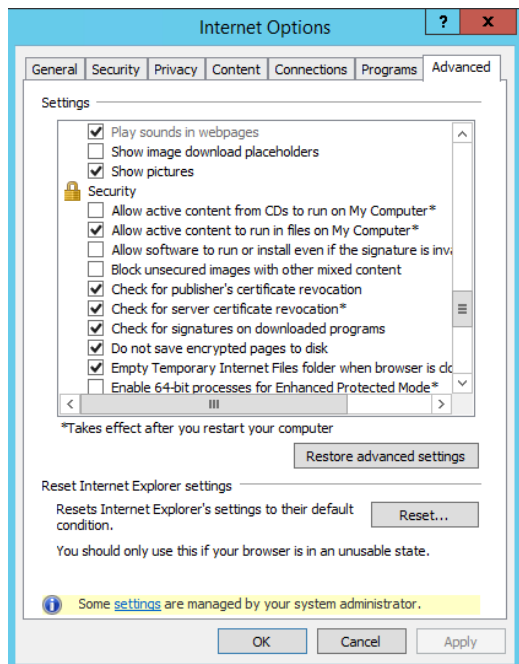

Transport Layer Security (TLS) is a protocol that ensures that a connection to a remote endpoint is securely encrypted in order to provide privacy and data integrity. PremierBank applications (like Online Banking) use TLS as a key component of their security. TLS 1.2 is the most current version and is considered to be the most secure.

To prepare for this change, you should ensure that you are using operating systems and browsers that support TLS 1.2. Below is a basic TLS 1.2 compatibility chart.

Browsers and Operating Systems	TLS 1.2 Compatibility Notes
Microsoft Edge	Compatible by default
Microsoft Internet Explorer Version 11	Compatible by default
Microsoft Internet Explorer Versions 9 and 10	Capable when run in Windows 7 or newer, but not enabled by default
Firefox 27 and higher	Compatible by default
Google Chrome 38 and higher	Compatible by default
Oracle Java version 1.7 and higher	Compatible by default
Mobile Safari Version 5 and higher	Compatible by default
Microsoft Windows 7, 8.0, 8.1 and 10	Compatible by default
Microsoft XP/Vista and below	Not compatible with TLS 1.2

How to Enable Transport Layer Security (TLS) 1.2

1. From your internet browser, select **Tools**, then **Internet Options**.
2. Click the **Advanced Tab**, and scroll down to **Security Section**.

3. Ensure TLS 1.2 is checked. If not check **TLS 1.2** and select, **Apply**, then **OK**.
4. Do not uncheck TLS 1.0 and 1.1 as access to other sites may be affected.
